### If it has a power cord, we can configure it!

Its a simple concept! Smarter technology means better business. **Nettology is a proactive Network and Computer Support company.** We can be your internal IT department or just a resource for your in house IT Staff. We handle it all, PC's, Servers, Networks, Security, and Backups.

Nettology consultants will give you unbiased solutions to improve your company's functionality. We service networks both large and small. Our help desk is staffed and available 24hrs every day for our clients.

Please give us a call or email us for a brief discussion on how we can fit into your IT plans.

### Better Business Through Smarter Technology

Your technology infrastructure can make or break your company.

Smooth operations of your hardware and software can keep your business running like a finely tuned high-performance car. Bad technology configuration, implementation or maintenance can leave your business stranded on the side of the road frantically looking for a jump start.

**Nettology** keeps your business running at peak performance by delivering you cost-effective expertise in:

- Servers
- Routers
- Switches
- Networks
- Firewalls
- Security
- VoIP
- VMware
- Backup Systems
- Applications Maintenance

**Nettology** services networks large and small. We can be your company's total IT solution or provide as-needed expert resources for your existing IT department.

Explore our site and [contact us](#) today. We're here to help you use technology wisely.
